## LISTINGS OF APPLICATIONS FOR CONSTRUCTION PERMITS TO MODIFY FM BROADCAST FACILITIES TO BE MADE AVAILABLE TO THE PUBLIC ON A BI-MONTHLY BASIS

Beginning on January 2nd, 1990, listings of applications for construction permits to modify the facilities of FM broadcast stations pending before the FM Branch of the Audio Services Division of the Mass Media Bureau will be made available to the public in the Public Reference Room located on the 2nd floor of the Commission's Main Offices, Room 239, 1919 M Street, N.W., Washington, D.C. 20554. These lists will be updated on the 1st and 15th of each month. Pending applications will be listed on either the "Awaiting Action" list or the "Blocked" list as appropriate.

Applications on the "Awaiting Action" list are assigned for processing in order by file date (date received) and are numbered accordingly. The dates of Commission actions may vary somewhat from this order, however, as the work associated with individual applications may vary substantially. Estimates as to when initial action will be taken on an application on the "Awaiting Action" list can be made by observing the number of positions it advances on successive bi-monthly lists.

Initial action on applications may be of four general types: (1) grant, (2) return/dismissal, (3) deficiency letter, (4) notification that further action is blocked pending some related event. Applications which are acceptable for filing but which cannot be acted upon are placed on the "Blocked" list by file number along with the reason for their being blocked. The most frequent reasons are: lack of FAA clearance, lack of Canadian or Mexican concurrence, conflict with a pending rulemaking, or some other deficiency such as inadequate showing as to compliance with FCC guidelines for human exposure to radiofrequency radiation. An application will be rescheduled for prompt action when the reason for its blockage is resolved.

Questions regarding these lists may be directed to James Crutchfield (202) 632-4504.
